

Are the spools and boxes that EPM sells acid and lignin free and, can they be used for long term storage?

The 16mm and 35mm Black Plastic Spools (International Only) are made from polystyrene and the Black Plastic Microfilm Boxes are made from polypropylene.

Both the spools and storage boxes are acid free and lignin free and may be used as enclosure materials for long term keeping of microfilms as per the ANSI/ISO Standards below.

Imaging materials - Processed safety photographic films - Storage practices - ISO 18911

Imaging materials - Processed photographic films, plates and papers - Filing enclosures and storage containers – ISO 18902
