EPM

As cost efficient as microfilm is, the images on it are priceless. We protect them during, and after, processing against everything nature and fate have to offer. Our unique disaster recovery program is just one of the extras you get with IMAGELINK microfilm. It's a special lab, equipped to rescue your priceless images from flood, fire or any disaster.

Consider the range of threats to your records: fire, sprinkler malfunctions, sewer backups, flooding due storms or fire fighting, truck or plane crashes or theft. We offer this service for one reason: your images are priceless. And we value them as much as you do. For Details, call your EPM representative or email info@epm-inc.com
