

What color safe light filter should be used with what film?

The # 3 Dark Green filter must be used for Camera Negative films such as HQ, FS, RAM and UC. **(Do not use Green filter with Silver Duplicating films)**

The # 1 Red filter must be used for Silver Duplicating films such as X462, X468, and X470. **(Do not use Red filter with Camera Negative films)**

Note: Suggested Maximum white bulb wattage is **7.5 Watt**. Housing must be affixed **6 to 8** feet above the work surface to insure no fogging.

Please see the information below.
