

*Daily cleaning procedures must include the following areas:*

- 1. Exposure lamps (dirt inhibits exposure = light density)*
- 2. Inside of film unit (air borne dirt & film dirt = image loss)*
- 3. Document Board (dirt & static build-up = lost \$\$\$\$)*
- 4. Lens (dirt = out of focus condition, image loss)*

*Clean all surfaces with a lint free cloth*

*Lightly dampened with water.*

*Water is a natural anti-static solution, and will prevent dirt build-up for eight hours.*
