

**Got water spots on the film coming out of your
processor?**

Do you have hard water?

Have your water analyzed at no charge. Contact Howard Schwartz in the Eastman Park Micrographics Quality Assurance Lab at 800-943-4561.

Water hardness and total dissolved solids (ppm = parts per million)

Desired total water hardness = 40 to 150 ppm

Desired total dissolved solids = less than 200 ppm

Use of Kodak Photo-Flo Solution in processors (helps keep mineral deposits off of film).

Catalog Number

146-4510 – 16 fluid ounces

Mix ratio = 1 part solution to 9 parts water

Use a few drops/liter in processors rinse water tanks (Note: do not over use this product)

Ensure the rollers in the dryer cabinet are free from water deposits as they may hinder the drying process. Also ensure proper airflow to dryer cabinet, clean in coming air filter monthly.
