

Eastman Park Micrographics offers long term storage containers for microfilm rolls

*You can use either “paper” or plastic containers for microfilm storage. However, they must meet ANSI/ISO Standards for long term storage. They **must** be acid and lignin free.*

16mm and 35mm Black Plastic Microfilm Boxes manufactured for EPM are made from polypropylene. The storage boxes are acid free and lignin free and may be used as enclosure materials for long term keeping of microfilms as per the ANSI/ISO Standards below. Contact EPM Customer Service for pricing and availability.

[ISO 18911-2000](#), Imaging Materials - Processed Safety Photographic Films - Storage Practices

[ISO 18902-2001](#), Imaging Materials – Processed Photographic Films, Plates, and Papers - Filing Enclosures and Storage Containers

[ANSI/AIIM MS-23-1998](#), Production, Inspection & Quality Assurance
