

- 1) Close the I9600 application and Input Processor
- 2) Place the upgrade onto desktop
- 3) Change the name of the folder IMAGELINK i9600 Application Software in c:Programs (x86)\Kodak

Example:

- 4) Double click on the upgrade
Note: If you are not an Admin, right click on .exe file and click on “run as administrator”
- 5) Follow steps in upgrade to install
- 6) Open the i9600 application and go to Administration/Writer. You should see exposure changed 1-90
